INTRODUCTION

The Department of Advanced Education works with other government departments in attempting to ensure that there are adequate numbers of appropriately trained manpower to provide the health and social services required by the citizens of Alberta. An inter-departmental committee composed of representatives of the Department of Advanced Education, the Department of Social Services and Community Health, the Department of Hospitals and Medical Care and the Department of Manpower has been charged with coordinating efforts in this area. This Health and Social Services Disciplines Committee has initiated the collection of a variety of information to provide an overview of the supply of and demand for health and social service manpower. This information will aid post-secondary educational institutions, service agencies and government departments in making decisions pertaining to the types and size of programming efforts in the health and social service fields.

The purpose of the inventory is to provide information on the training output from health and social service training programs in the Province. The data, primarily on the number of enrollees and graduates, can be used in conjunction with information provided by the service sector to identify the demand which may be placed on the advanced education system in the future and assess the capability of the system to meet that demand. Additional information on manpower supply and demand is available in the Health and Social Services Disciplines Committee Annual Report.

This inventory is not intended to provide an explanation of the various health and social service programs. Calendars providing detailed descriptions of the program requirements and related practicums can be obtained by contacting the appropriate vocational centre, college, technical institute or university.

The information in this inventory is for the 1978-79, 1979-80, 1980-81, 1981-82 and 1982-83 academic years and will continue to be updated on an annual basis.

Further information on the inventory can be obtained by contacting:

FORMAT OF INVENTORY

The information in this inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of training programs and institutions offering the programs;

2. data on the number of applicants, enrolments and graduates in the 1978-79, 1979-80, 1980-81, 1981-82 and 1982-83 academic years; length of programs; intake and graduation dates; and information on quotas; and

3. a comments section which describes the data.

Because it was not always possible for an institution to provide all the data requested for the inventory, some of the tables are incomplete. When information was not available or not compiled for the inventory a dash (-) has been entered into the table. Blanks are used when information is not applicable to a program. The most common example of this is found in programs which do not have part time students. In these cases the PT columns on the tables will be blank.

The tables are structured, where possible, as follows:

Academic Year	1978-79	1979-80	1980-81	1981-82	1982-83
Quota	20				
	FT PT	FT PT	FT PT	FT PT	FT PT
Applicants	27				
Enrolments					
1st Year	20				
2nd Year		19			
Graduates		18			

The tables differentiate between part-time and full-time students wherever possible. Occasionally, a figure will be listed which falls between the part-time and full-time columns of the table. This figure can be interpreted as representing both part-time and full-time students.

If readers wish to determine the attrition from a particular class, they can follow the enrolments from the first year of a particular program through to graduation. For example, in the table on the preceeding page, the second year enrolments shown in 1979-80 column of a two-year program represent the same class shown as first year enrolments in the 1978-79 column. The number of graduates from this two-year program would be shown as graduates in 1979-80. The attrition over the two-year program was two students.

DATA COLLECTION AND DEFINITIONS

To collect the data presented in this inventory, the Health and Social Services Programs Branch of Advanced Education sent data requests to be completed by the head of each program. Program heads were sent forms which were used to present data on their program with the column for the most recent academic year left blank. They were asked to fill in the information and return the forms.

The terms "applicants", "enrolments", "graduates" and "academic year" were defined as follows:

1. applicants to the program were to be measured by the completed applications from which enrolment was chosen in that academic year.

2. annual enrolment was defined as the number of enrolments on the last possible date students were allowed to enrol in the first intake of the academic year, plus any new enrolments from subsequent intakes during the academic year.

3. graduates were defined as students who were awarded certificates, diplomas, or degrees.

4. academic year refers to September 1 of one year to August 31 of the following year (e.g. September 1, 1982 to August 31, 1983).

It is also important to note the following:

1. Quotas provided are occassionally exceeded as some attrition from a program may be anticipated or because students transfer from program to program. The quota refers to the optimal capacity of the program and is used as a general guideline for enrolment.

2. The deadline for accepting applications varies from program to program. Some program heads adhere to a strict deadline while others limit the number of applications they accept. Also, students often apply to more than one program in any given year. In some programs students apply directly to an affiliated health and social service agency.

3. Students are classified according to year depending upon the level of the majority of their courses. The number of students may increase from year to year due to students transferring into a program or repeating a year.

4. The comments provided at the end of each program summary qualify the data and should be reviewed when interpreting the data.

5. Provincial Summaries are provided on the yellow pages when more than one training program is reported.

Response to the data request was excellent and follow-up telephone calls were made when required. Updates on the data will be done on an annual basis.

TRAINING PROGRAM: Criminal Justice

PROVINCIAL SUMMARY:

Two colleges offer a program in Criminal Justice. However, Grant MacEwan Community College offers both a certificate and a diploma program and Mount Royal College offers only a diploma program. Therefore a provincial summary table has not been tabulated. See the following tables for information on each of the programs.

2nd Year (Dipl)	12				8	-	5		15	2

COMMENTS:

1. Grant MacEwan Community College offers both a one-year certificate program and a two-year diploma program. The certificate program is designed primarily for individuals already employed in the corrections field. The certificate only, and not the diploma, will be offered in 1983-84.

2. In 1982-83, only diploma level students registered.

COMMENTS: - Continued

3. Students who received diplomas did not usually receive certificates in previous years.

4. Attrition from this program has been extremely high in the past. Students could get jobs that did not require 2nd year. A new classification scheme for social service workers (probation officers) may provide the incentive required for students to complete the program at the diploma level.

CORRECTIONS

TRAINING PROGRAM: Criminal Justice Diploma

Graduates[4]	13	1	13		13		16		16	

COMMENTS:

1. The 1982-83 and 1983-84 quotas apply to the Justice Administration Department not just the Criminal Justice Diploma program.

2. As of the 1981-82 reporting period, all figures have been adjusted to reflect definitions which are consistent with the College Student Records System and official institutional reporting. Information reported prior to 1981-82 may be at variance from figures reported as of 1981-82.

3. Enrolment figures for 1980-81 academic year are not available by year of program.

4. Of the 1981-82 and 1982-83 graduates, one received a certificate. The number of graduates may exceed 2nd year students due to the manner of calculating 2nd year student status as well as the manner in which yearly graduate statistics are compiled.

COMMENTS:

1. The following off-campus locations are included: Fairview, Falher, Grande Cache, Grouard, High Prairie, Hinton, High Level, Peace River, Slave Lake, Spirit River, Valleyview, and Northern Regional Project.
2. The last year the on-campus certificate program was fully implemented was 1980-81. Thereafter, only the diploma program has been offered. Generally, students off-campus take courses part-time, leading to a certificate. However, some students have registered in second year courses at Fairview, Grouard, Slave Lake, and the Northern Regional Project so as to receive a diploma.
3. The quota and applicants refer to the full-time on-campus program and does not include courses offered at off-campus locations. This data is not available for earlier years.
4. The number of part-time students is estimated by calculating the total number of course registrations and dividing by the average number of courses taken by students for each location.
5. In 1981-82, the 11 students who qualified for diplomas also received certificates in previous years. Since then, the certificate program has been phased out in favor of the diploma, though the former is still available to outlying areas.

COMMENTS:

1. An Environment Quality Control Certificate is also offered. However, there have never been very many applicants, enrolments or graduates. For example, in 1981-82, 11 applications were received and 5 students enrolled in the certificate program.

2. Any students who leave the program between September and January are replaced by new students in January. This is an attempt to keep the enrolment at 30 throughout the year.

3. As of the 1981-82 reporting period, all figures have been adjusted to reflect definitions which are consistent with the College Student Records System and official institutional reporting. Information reported prior to 1981-82 may be at variance from figures reported as of 1981-82.

4. Applicants to the program refer to the number of students who apply to the program prior to registration and therefore does not include those students who enroll in the program after registration.

COMMENTS:

1. The post-R.N. Bachelor's Degree is offered to off-campus locations as a 3 year program, in which only the last year must be taken at the University of Alberta. Because many of the students have enrolled on a part-time basis, a maximum of five years is allowed in which to complete the program.

2. A number of students, though not registered in the program, have enrolled in some of the introductory courses offered. These students have not been included in the enrolment data.

COMMENTS:

1. Students with advanced credits can complete the program in 1 1/2 sessions. This means that they would complete the program in one calendar year and would not be listed here as 2nd year students. Therefore, more students would graduate than were enrolled in 2nd year.

COMMENTS:

1. Previous to the 1980-81 academic year there were two intakes in the program, one in September and one in March. Therefore, 1st year enrolments for 1980-81 also reflect students who enrolled in March 1980. These students proceeded into second year in March 1981.

2. The 1980-81 quota was set to accommodate curriculum revision which required extra faculty planning.

3. Part-time students enrolled in 1981-82 are registered in support courses only and not in nursing courses. These students will enroll in nursing courses in 1982-83.

COMMENTS:

1. As of 1981-82 academic year all figures have been adjusted to reflect definitions that are consistent with the College Records System and official institutional reporting. Information reported prior to 1981-82 may be at variance from figures reported as of 1981-82.

2. For Fall 1981, the numbers of students entering first year and second year nursing classes totalled 87 and 61 respectively. The mix of full-time/part-time and 1st year/2nd year reflected above differs somewhat from these numbers due to the definitions used for institutional reporting purposes which are based on contact hours and credits earned (including advanced credits).

COMMENTS:

1. The program is currently under review; hence no 1983-84 quota figures are available.

2. Until 1978-79 there were two intakes per year with a quota of 6 students per intake. Since 1979-80 there has been one intake per year. The program length has varied from 6 months to 8 months.

COMMENTS:

1. The quota for the first course in the program is 100 and 50 for all courses thereafter. There was no enrolment quota in 1980-81 and 1981-82.

2. The program is offered through Distance Delivery and is geared to part-time students. Those who wish may complete the program within 1 academic year, though few do. This accounts for the low number of graduates in comparison to enrolments recorded.

COMMENTS:

1. The 1983-84 quota pertains to full-time students only. The focus of the program is changing to part-time, distance delivery. Currently, no quota exists for part-time enrollments.

2. As of the 1981-82 academic year all figures have been adjusted to reflect definitions which are consistent with the College Student Records System and official institutional reporting. Information reported prior to 1981-82 may be a variance from figures reported as of 1981-82.

COMMENTS:

1. The quota and applicants refer to the on-campus program.

3. A "0" indicates that the program was not offered in that year.
4. Grant MacEwan Community College data include refresher students and credentialling students from other countries.
5. For manpower planning purposes, graduates from these programs increment the manpower pool but do not add to the number of R.N. graduates. These students previously qualified as R.N.'s and due to a lapse in service are qualifying to become re-registered.

COMMENTS:

1. The Bachelor of Science in Occupational Therapy program has a pre-professional year and students are admitted only to the second year of the program.

2. A three-year diploma was awarded until 1978-79. Subsequently many students who had received diplomas returned to upgrade their diploma to a degree in later years. This accounts for the increase in the number of students from 3rd to 4th year.

COMMENTS:

1. The quota includes transfer students enrolling in the 2nd year as well as 1st year students. Continuing 2nd year students are not counted in the quota.

2. Enrolment figures for academic years prior to 1979-80 should be interpreted with caution due to problems in retrieving the data.

3. Transfer students who have credit for the 1st year courses can enter the program at the 2nd year level. Enrolment figures are low in 1980-81 because more transfer students were admitted into 2nd year in 1980-81.

4th Year	49	36	56		40	18	40	29	40	15
Graduates[2]	60		62		44	3	51		56	

COMMENTS:

1. The reason for the increase in number of students from third year to fourth year is that there are several students who, each year, return to University to upgrade their diploma to a degree. These students are classified as degree completion or post-diploma students. Within the Department's records, however, there is no differentiation made as the same degree is awarded in the end.

2. The reason that more students may graduate than are registered in 4th year is due to the fact that students will sometimes complete the required physiotherapy courses at the University of Alberta and then leave the University. These students then attend other universities in other cities to complete their optional courses while working. Upon successful completion of these approved electives the students would be awarded a degree from the University of Alberta.
